

HCA-103 Medical Coding

Description:

HCA-103 provides the most trusted resources available to help students master today's most current 2020 CPT® and HCPCS diagnostic and procedural coding as well as the other precise guidelines established by federal agencies, Medicare and the American Medical Association (AMA). Carefully illustrated procedures, contemporary case studies and the latest practical coding assignments as well as memorable examples help students learn procedural coding for all medical specialties and successfully prepare for certification exams. This course's resources also work seamlessly with CPT® and HCPCS Level II manuals.

Textbook: Understanding Current Procedural Terminology and HCPCS Coding Systems, 7th Ed.
– Bowie - ISBN: 9780357378526

Course objectives:

Throughout the course, you will meet the following goals:

- Discuss the purpose of Current Procedural Terminology (CPT).
- Explain the purpose of Evaluation and Management (E/M) codes.
- Locate procedure codes within the Integumentary Surgery section of the CPT manual.
- Identify CPT codes and HCPCS codes for all body systems.
