

BUS-403 Managerial Accounting

Description:

This course focuses on three major themes: Ready, Reinforcement, and Relevance. BUS-403 adopts a concise, jargon-free, and easy-to-understand approach in which key concepts are provided in short segments with step-by-step instructions to simplify concepts. Since all students perform better when they can answer the “why” question, meaningful references to companies throughout the course help students tie the concepts presented in each chapter to real organizations. In addition, realistic managerial scenarios present an issue that must be addressed by the management accountant. These scenarios increase student interest and show how issues can be resolved using the concepts presented in the course.

Textbook: *Managerial Accounting*, 7th Ed. – Mowen, Hansen, Heitger - ISBN: 9781337115919

Course objectives:

Throughout the course, you will meet the following goals:

- Compare characteristics of financial and managerial accounting.
- Distinguish between job costing and process costing.
- Understand why organizations allocate overhead costs to products.
- Identify how product costs flow through accounts using process costing.
- Identify typical cost behavior patterns.
- Perform cost-volume-profit analysis for single-product companies.
- Describe the format used for differential analysis.
